

Accelerating Nature's Way

## Is Your Lake In Peril?

Got Weeds? Got algae? Got muck?

Greenwood Lake, New York

Before

These are symptoms of a much deeper problem - nutrient overloading. 48% of Lakes and Reservoirs are in peril from Nutrient Overloading - US-EPA

*"Decades of nutrient overloading from fertilized lawns and farm fields have turned our lakes into compost piles of muck with water on top"*

- John Tucci, President of Lake Savers

## Chemicals, dredging & alum treatments make matters worse...

- These are expensive "symptom treatment" strategies that don't fix the problem of nutrient overloading
- **Nature has the answer... so do we**
- Fix nutrient overloading and weeds, algae and muck disappear...

*Which would you rather have a chemically treated lake or bigger, healthier fish and clean, clear water?*

## The Solution—Accelerating Nature's Way!

Turn Phosphates Into Fish

## Lake Savers Whole-Lake Technology™

Our Whole Lake Technology is scientifically proven to restore Lake Health by reducing excess nutrients in the water and the "compost pile" at the bottom:

- **Inversion Oxygenation** - Lakes need to breathe to be healthy... we get your lake breathing again so that fish and other beneficial life can thrive.
- **Bio-Acceleration Strategies** - Beneficial bacteria, enzymes and diatoms are Nature's best water cleaners. We put them to work to turn muck and phosphates into food for fish!
- **In-Lake Wetland Filtration** - Wetlands are Nature's Way of filtering nutrients from water. Our Lake Coral and Bio-Haven Technology bring the power of wetland filtration to the lake itself.

## We Partner with Lake Communities

## Our Proven Approach:

- We educate and energize lake communities
- We'll design your lake's Restoration Plan FOR FREE
- We finance your lake's restoration...
- We install and manage our technology...
- We ensure long-term sustainable lake health
- We deliver results typically for less than \$2 per day per lake homeowner!

## 40+ lakes and reservoirs restored since 2006...

Greenwood Lake, New York

After

*"We studied and interviewed many companies and their methods of treatment. We contracted with Lake Savers. It definitely was the right thing to do, period. They have the right approach and by far the best technology." - George Hartley, Keeler Lake*
